

Mainstay Magnesium

GROWING BEYOND WITH REDOX

GUARANTEED ANALYSIS

Magnesium (Mg)20%

WHAT IS MAINSTAY MAGNESIUM?

Mainstay Magnesium is a reacted plant nutrient high in magnesium.

HOW DOES IT WORK?

Mainstay Magnesium is formulated using a unique microencapsulation process. This allows for greater plant assimilation of magnesium.

KEY PRODUCT BENEFITS

1. Improved plant and crop quality due to the impact of magnesium on chlorophyll production.
2. High magnesium uptake without chloride, sulfate, or nitrate.

MOST EFFECTIVE USE

SOIL APPLICATIONS

Apply through all controlled irrigation systems at a rate of 0.25 to 5 gallons per acre per application.

Apply directly to the soil and water in at a rate of 0.25 to 5 gallons per acre.

Frequency and quantity of applications depend upon specific crop requirements.

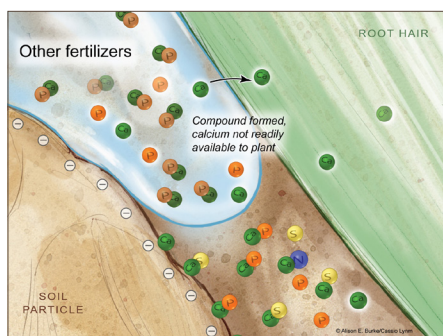

Mainstay Magnesium

RELEVANT TERMS

MAGNESIUM - Critical to chlorophyll production in plants.

MICROENCAPSULATION - Reacted nutrient with surfactant technology.

OTHER FERTILIZERS
