

GUARANTEED ANALYSIS

Total Nitrogen (N)	10%
10%.....Ammoniacal Nitrogen	
Available Phosphate (P ₂ O ₅)	58%

HOW DOES IT WORK?

P-58 provides high efficiency phosphorus nutrition due to unique Redox complexing process.

WHAT IS P-58?

P-58 is a reacted plant nutrient high in phosphorus.

KEY PRODUCT BENEFITS

1. Excellent environmental impact profile.
2. Efficient phosphorus nutrition due to resistance to tie-up.

MOST EFFECTIVE USE

SOIL APPLICATIONS

Apply through controlled irrigation systems, side-dress or sprayed down and water in at rates of 1 to 6 pounds per acre.

Apply at planting at a rate of 1 to 6 pounds per acre.

Directly apply to seed at a rate of 1 to 3 pounds per 100 pounds of seed.

Apply to transplants at a 2% solution by weight.

FOLIAR APPLICATIONS

Apply via a foliar application at a rate of 1 to 4 pounds per acre.

Use higher rates for higher water volume.

Frequency and quantity of applications depend upon specific crop requirements.

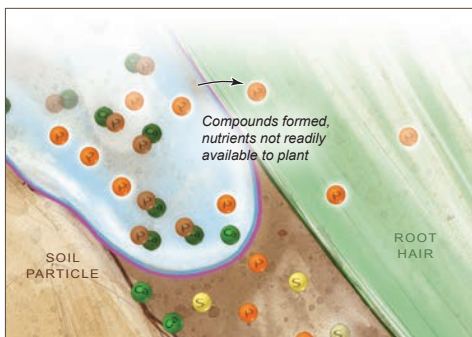

P-58

RELEVANT TERMS

COMPLEXING - Reaction with an anion or mono-valent cation for the purpose of preventing undesirable reactions.

PHOSPHORUS - Energy production in plant cells.
