| 2%.....Ammoniacal Nitrogen | |
| Available Phosphate (P ₂ O ₅) | 15% |
| Soluble Potash (K ₂ O) | 2% |

HOW DOES IT WORK?

TurfRx P+ stimulates root growth due to the phosphorus and L-amino acid content.

WHAT IS TURFRX P+?

TurfRx P+ is a reacted plant nutrient high in phosphorus.

KEY PRODUCT BENEFITS

1. Optimum root growth stimulation for the budget dollar.
2. Excellent environmental impact profile.
3. Efficient phosphorus nutrition due to resistance to tie-up.

MOST EFFECTIVE USE

SOIL & FOLIAR APPLICATIONS

Apply through controlled irrigation systems, fertigation systems, or spray at rates of 0.25 to 1.5 gallons per acre (0.75 to 4.5 ounces per 1000 ft²), and water in.

OTHER APPLICATIONS

Directly apply to seed at a rate of 0.25 to 1.5 gallons per 100 pounds of seed.

Applications for seeding or sprigging should be made directly to the surface at a rate of 0.25 to 1.5 gallons per acre (0.75 to 3 ounces per 1000 ft²) in 50 or more gallons of water per acre.

Frequency, rate, and quantity of applications depend upon specific crop requirements.

RELEVANT TERMS

COMPLEXING - Reaction with an anion or mono-valent cation for the purpose of preventing undesirable reactions.

L-AMINO ACIDS - Carbon, hydrogen, oxygen and nitrogen compounds that are key to plant metabolism and protein production.

PHOSPHORUS - Energy production in plant cells.
