

TriPlex Magnesium

GROWING BEYOND WITH REDOX

GUARANTEED ANALYSIS

Magnesium (Mg) 11%

HOW DOES IT WORK?

Efficient uptake due to chelation.

WHAT IS TRIPLEX MAGNESIUM?

Triplex Magnesium is a reacted plant nutrient high in magnesium.

KEY PRODUCT BENEFITS

1. Efficient leaf absorption.
2. Efficient uptake from the root system from soil applications.
3. Powerful results for the budget dollar.

MOST EFFECTIVE USE

SOIL APPLICATIONS

Apply through all controlled irrigation systems at a rate of 0.25 pounds to 6 pounds per acre per application. Apply directly to the soil and water in at a rate of 0.25 pounds to 6 pounds per acre.

FOLIAR APPLICATIONS

Apply via foliar application at a rate of 0.25 to 3 pounds per acre. Maintain a concentration of 1% or less by weight.

Frequency and quantity of applications depend upon specific crop requirements.

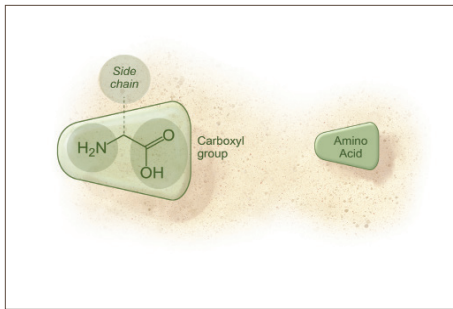

TriPlex Magnesium

RELEVANT TERMS

CHELATION - Reaction with a divalent cation for the purpose of preventing undesirable chemical reactions.

MAGNESIUM - Critical to chlorophyll production in plants.
